TEIGNMOUTH URBAN DISTRICT COUNCIL

ANNUAL REPORT - 1953.

Mr. Chairman and Councillors,

Gentlemen,

I present my first Annual Report for the year ended the 31st. December, 1953. My duties as Medical Officer of Health to the Council commenced on the 10th. July, 1953 when I took over on the retirement of Dr. F.S.L. Piggott who had served the Council for thirty-six years.

During the first eight months of the year Mr. N.S. Tucker, the Sanitary Inspector was on sick leave, and we are indebted to the Borough of Torquay for providing the part time services of two of the Borough's Sanitary Inspectors to deal with the more urgent duties of the Department.

The Death rate, after the application of the comparability factor to allow for the fact that many more older people in retirement live in this district than are found in more populous and industrialised parts of the country, is below that for England and Wales as a whole.

The Infant Mortality rate, that is death of infants under one year of age, is considerably below that for the Administrative County of Devon and for England and Wales as a whole. All three of these deaths occurred in children in the first four weeks of life and in consequence the Neo-Natal Mortality rate is the same as the Infant Mortality rate.

Two hundred and forty-six cases of Measles were notified during 1953 as compared with seven cases in 1952. The increased incidence in alternate years is typical of this disease.

In November of this year an Order was made under the Food and Drugs (Milk, Dairies and Artificial Cream) Act, 1950 under which all milk sold by retail on or after the 2nd. December, 1953 would have to be "Pasteurised", "Sterilised", "Tuberculin tested", or "Accredited" milk from a single herd. From a Public Health point of view this is a great advance as it is only by action such as this that cases of bovine tuberculosis can be eliminated.

In no case during 1953 did official action have to be taken under the National Assistance Acts 1948 and 1951 but unofficial action, which is always to be preferred, has been taken frequently. The problem of aged persons in the District who are without proper care and attention becomes more acute

each year. Residential and hospital accommodation for these people is very limited and even in acute cases it is often not possible to find an immediate vacancy. An unfortunate feature of the Welfare Service in this direction is the difficulty which arises in those cases where there is a need for some minor medical treatment not in itself sufficient to warrant the use of a Hospital bed, but sufficient to preclude admission to one of the County Council's homes.

I append also my Port Health report for the year which has been compiled to comply with the Ministry of Health "Form Port 20".

I should like to thank the Chairman, Councillors and all members of the staff for the help and co-operation received since my appointment.

I have the honour to be,

Your obedient Servant,

*A. L. Davis*

Medical Officer of Health.

## STATISTICS AND SOCIAL CONDITIONS OF THE AREA

Area (in acres) .....	2,350
Population Mid - 1953 .....	10,440
Population 1951 Census .....	10,589
Rateable Value as at 1st. January, 1953 ..... £.	98,972

WATER SUPPLY.

As for many previous years, there was a considerable deficiency during the summer at Shaldon where the old 4" trunk main, laid in 1907 was encrusted; in the New Road area where the demand had exceeded the mains capacity and on the Coombe Valley District which draws water direct (without storage) from the 9" trunk main at Headway Cross and where the distribution system is in-adequate.

Schemes were prepared and approved by the appropriate Minister for alleviating the position in New Road and Shaldon and it is proposed to carry these out before Midsummer of 1954.

The Teignmouth supplies are derived from the Paignton Waterworks (Holne, Dartmoor) in bulk and the local wells at Shaldon and Mylor.

WATER SUPPLY (continued).

Population supplied :-	Winter	11,000	
	Summer	20,000 to 25,000.	
Total number of dwellings :-		3,423.	
Total consumption :-	High level	85,167,000	gallons.
	Low level	67,814,000	"
	Shaldon	21,560,000	"
		<hr/>	
		174,541,000	gallons.
		<hr/>	

Maximum daily consumption - 576,230 gallons.

I am indebted to the Council's Water Engineer for the report upon the Water Supply of the District for the year.

---

## SANITARY INSPECTOR'S ANNUAL REPORT, 1953.

Mr. Chairman and Councillors,

Gentlemen,

I beg to submit herewith the Annual Report for the year ended 31st. December, 1953.

### STAFF

During the first eight months of the year I was absent from the office owing to illness. The duties of the post were carried out with the ready assistance of the Surveyor's Department and also by the co-operation of the Torquay Town Council which permitted its Public Health staff to regularly visit the District.

### INSPECTIONS AND VISITS.

During the year 2,174 inspections and visits have been made in connection with Official Duties. These are divided as follows:-

Inspections re Housing	99
Inspections re Nuisances, Drainage, etc.	659
Inspections of Food premises, etc.	140
Inspections of Factories and Workplaces	72
Visits in connection with Rats and Mice Infestations	642
Visits in connection with Refuse and Salvage	312
Visits in connection with Infectious Diseases etc.	50
Visits - Miscellaneous	200

### DRAINAGE AND SEWERAGE.

The built-up portion of the District is sewered and with the exception of a few out-lying houses and farms, which are removed from such sewers, the whole of the houses in the District discharge to pipe sewers which are connected, via storage tanks and pumping stations, to two controlled outlets at the mouth of the River Teign.

### FOOD INSPECTION.

There are now no licensed or registered slaughter-houses in the District and all meat is brought to the Town from the Ministry of Food Slaughter-house at Newton Abbot, etc.. During the year 140 visits have been paid to food premises and 909 packets and tins of various foodstuffs, weighing 1,462 lbs. have been condemned. The following quantities of other foods were also surrendered:-

Beef .....	116 lbs.
Sausages .....	79 lbs.
Salmon .....	9 lbs.
Cheese .....	6 lbs.
Hammon .....	21 lbs.

---

Total : 231 lbs.

---

making a total weight of 1,693 lbs. condemned as unfit for human food. No legal action was necessary in regard to any of the above.

### FOOD SAMPLING.

Four samples of clotted cream were taken and submitted to the Public Health Laboratory for examination, following complaint from the Medical Officer of Health of one of the large inland cities as to an unsatisfactory sample. Those taken locally were satisfactory as regards bacteriological content.

Also twelve samples of mussels were taken, before, during and after the process of purification, to prove the efficiency of the cleansing system inaugurated during the year.

### REFUSE COLLECTION AND DISPOSAL.

This is under the control of the Public Health Department. Collection of refuse (once weekly from Private houses and twice weekly from Hotels and Boarding Houses) is executed by two "Karrier Bantam" Refuse Vehicles, with assistance by the Surveyor's or hired lorries. Tipping, by controlled methods, is at the Council's Tip at Broadmeadow, which it is proposed eventually to convert to an extensive level area, capable of accommodating football grounds, cricket pitches, tennis courts, etc., which are badly needed in the District.

### HOUSING.

During the year twenty-two new Housing Units have been erected and occupied on the Council's Housing Estates at Coombe Valley and at Ringmore, Shaldon. In addition twenty-eight new tenants have been accommodated in Requisitioned Premises or in vacated Council Houses. As far as possible, with the premises available, transfers are arranged between tenants so that the size of the house concerned is in proportion to the size of the family. The list of applicants for the tenancies of Council premises shows little sign of decreasing, but there are few large families remaining on the Council's List and the greater need at the present time is for two bedroomed flats to accommodate small families. However, a proportion of three bedroomed houses must be built, to accommodate mixed families, now and in the future.

### RODENT CONTROL.

This remains one of the major duties of the Public Health Department. During the fifteen months ended the 31st. March 1954, 253 premises were treated for the eradication of rats and/or mice, with satisfactory results. These treatments entailed 642 visits and in addition numerous inspections were made of other properties to establish the degree, if any, of infestation.

Also test baitings and treatments of the Council's sewers were made, as requested by the Ministry of Agriculture and Fisheries.

---

I am, Gentlemen,

Your obedient Servant,

N.S. TUCKER.

Sanitary Inspector.

# FACTORIES ACTS, 1937 & 1948.

## ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH IN RESPECT OF THE YEAR 1953 FOR THE URBAN DISTRICT OF TEIGNMOUTH IN THE COUNTY OF DEVON.

### Prescribed Particulars on the Administration of the Factories Act, 1937.

#### PART 1 OF THE ACT.

#### 1. INSPECTIONS for purposes of provisions as to health (including inspections made by the Sanitary Inspector).

	No: on Register	Inspection	Written Notices	Number of Occupiers Prosecuted
(i) Factories in which S. 1, 2, 3, 4, & 6 are to be enforced by L/A	37	37	4	Nil
(ii) Factories not included in (i) in which S. 7 is enforced by the L/A	67	30	6	Nil
(iii) Other premises in which S. 7 is enforced by the L/A (excluding workers' premises).	7	5	Nil	Nil
TOTALS	111	72	10	Nil

#### 2. CASES IN WHICH DEFECTS WERE FOUND

	No: of cases in which defects were found.				No: of cases in which prosecutions were instituted.
	Found	Referred to H.M. Insptr.	Referred to H.M. Insptr.	By H.M. Insptr.	
Want of cleanliness S.1.	1	1	-	-	Nil
Overcrowding S.2.	-	-	-	-	Nil
Unreasonable Temperature S.3.	-	-	-	-	Nil
Inadequate Ventilation S.4.	1	1	-	-	Nil
Ineffective drainage of Floors S.6.	-	-	-	-	Nil
Sanitary Conveniences (a) Insufficient S.7.	3	3	-	-	Nil
(b) Unsuitable or defective	3	3	-	-	Nil
(c) Not separate for Sexes	-	-	-	-	Nil
Other offences against the Act.	2	2	-	-	Nil
TOTALS	10	10	-	-	Nil

No cases of outwork being carried on in unwholesome premises have been found and consequently Table 3 has not been included.

### SECTION IV.

#### INLAND BARGE TRAFFIC.

Numbers and tonnage using the district and places served by the  
traffic - Nil.

### SECTION V.

#### WATER SUPPLY.

- (1) Source of supply for (a) the district, and (b) shipping.

The main water supply which serves the district is used  
for the shipping.

- (2) Reports of tests for contamination.

Regular samples of water taken from all the Council's sources  
of supply and submitted for bacteriological examination. The  
results received are satisfactory.

- (3) Precautions taken against contamination of hydrants and hose-  
pipes.

The hydrants and hosepipes are regularly inspected by the  
Port Sanitary Inspector. The hosepipes are stored under  
cover by the Teignmouth Quay Co. Ltd. and are well flushed  
out prior to use.

## SECTION V. - WATER SUPPLY (continued).

### (4) Number and sanitary condition of water boats.

There are no water boats operating at this port.

## SECTION VI.

### PUBLIC HEALTH (SHIPS) REGULATIONS, 1952.

#### (1) List of Infected Areas.

The weekly record of Quarantinable Diseases issued by the Ministry of Health is forwarded by post to the Preventive Officer, Customs House, Teignmouth.

#### (2) Radio Messages.

##### (a) Arrangements for sending permission by radio for ships to enter the district.

Arrangements have been made with the Post Office for sending Wireless Messages if required. None were sent during 1953.

##### (b) Arrangements for receiving messages by radio from ships and for acting thereon.

Arrangements have been made with the Post Office for receiving Wireless Messages if required. None were received during 1953.

#### (3) Notifications otherwise than by radio.

A 24 hour watch is maintained at H.M. Coastguard Station at Brixham from which signals by morse or flag may be sent or received as and when necessary.

#### (4) Mooring Stations.

Where action is to be taken under Regulations 22 - 30 the ship will be made fast in the harbour at No. 1 Tier of Buoys off the New Quay.

#### (5) Arrangements for:-

##### (a) Hospital accommodation for infectious diseases (other than smallpox - see Section VII.)

Patients suffering from infectious disease will be transferred by ambulance to either the Isolation Hospital at Torquay (Tel. No. Torquay 63276) or to the Isolation Hospital at Whipton, Exeter (Tel. No. Exeter 67158).

##### (b) Surveillance and follow-up of contacts.

This will be carried out by the Port Medical Officer whilst the ship is within this port. Arrangements have also been made for letters to be given to the contacts in cases where the ship has to proceed to another port before the expiration of the period of surveillance. The contacts will be instructed to take these letters to the Port Medical Officer of the next port of call thus informing him of the circumstances.

##### (c) Cleansing and disinfection of ships, persons, clothing and other articles.

Disinfection of ships will, when necessary, be undertaken by the Port Sanitary Inspector. Disinfection of clothing

SECTION VI. - PUBLIC HEALTH (SHIPS) REGULATIONS, 1952 (contd.)

(5) Arrangements for:-

(c) Cleansing and disinfection of ships, persons, clothing and other articles. (continued)

or bedding may be carried out at the steam disinfectors station of the Teignmouth Urban District Council.

Cleansing of verminous persons will be carried out by staff of the Public Health Department, Borough of Torquay.

SECTION VII.

SMALLPOX.

- (1) The Isolation Hospital to which smallpox cases will be sent from the District is the Smallpox Hospital, Upton Pyne, near Exeter (Tel. No. Stoke Canon 207). Admissions to be made through the Medical Officer of the Isolation Hospital, Whipton, Exeter (Tel. No. Exeter 67158).
- (2) Transport arrangements for smallpox cases will be made by the Medical Officer of the Isolation Hospital, Whipton, Exeter.
- (3) The following consultants are available as and when necessary:
  - (1) Dr. C. Seward - 20 West Southernhay, Exeter.  
Tel. Nos. Exeter 2110 - Day.  
Exmouth 4120 - Night.
  - (2) Dr. W.J. Laird - City Hospital, Exeter.  
Tel. Nos. Exeter 2671 - Hospital.  
Exeter 3116 - Home.
- (4) Specimens for laboratory diagnosis will be sent to the:-  
Virus Reference Laboratory,  
Central Public Health Laboratory,  
Colindale,  
LONDON, N.W. 9.

SECTION VIII.

Venereal Disease.

Facilities are available for the diagnosis and treatment of venereal disease among merchant seamen under international arrangements.

Torbay Hospital, Torquay - Tel. No. Torquay 63254.  
Mondays, Tuesdays, Wednesdays, Fridays,  
and Saturdays - 17.00 hrs. to 19.00 hrs.

SECTION IX.

Cases of notifiable and other infectious diseases on ships.

No cases of notifiable and other infectious diseases were reported during the year.

## SECTION X.

### Observations on the occurrence of malaria in ships.

No cases of Malaria were notified during the year.

## SECTION XI.

### Measures taken against ships infected with or suspected for plague.

No action necessary under this section.

## SECTION XII.

### Measures against Rodents in ships from foreign ports.

#### (1) Procedure for inspection of ships for rats.

Enquiries are made from masters of vessels using the port by the Port Sanitary Inspector regarding the presence of rats.

#### (2) Arrangements for the bacteriological or pathological examination of rodents, with special reference to rodent plague, including the number of rodents sent for examination during the year.

Facilities are available for the bacteriological examination of rodents at the:-

Public Health Laboratory, 7 Dix's Field, Exeter  
Tel. No. Exeter 54959.

No rodents were sent for examination during the year.

#### (3) Arrangements in the district for deratting ships, the methods used, and, if done by a commercial contractor, the name of the contractor.

A ship requiring deratting would be referred to Plymouth.

#### (4) Progress in the rat-proofing of ships.

No action is taken in this matter at Teignmouth.

#### TABLE E. - Rodents destroyed during the year in ships from foreign ports.

No rats have been destroyed, at Teignmouth, in ships from foreign ports during 1953.

#### TABLE F. - Deratting Certificates and Deratting Exemption Certificates issued during the year for ships from foreign ports.

Not applicable to this authority.

## SECTION XIII.

### Inspection of ships for nuisances.

#### TABLE G. - Inspections and Notices.

Forty routine inspections were carried out during the year. No action was necessary regarding the service of Notices.

#### SECTION XIV.

##### Public Health (Shell-Fish) Regulations, 1934 and 1948.

During 1953, as a result of investigations made by Dr. J. Cauchi of the Ministry of Health and Mr. H.P. Sherwood and Dr. N. Reynolds of the Ministry of Agriculture and Fisheries, positive action was taken to obtain the bacteriological cleansing of mussels from the River Teign. Dr. Reynolds' tests had proved that the mussels would cleanse themselves if submerged in water pumped from the Estuary at approximately high tide and consequently with the co-operation of the Mussel Fishermen and the Council, a site was selected, tanks constructed, electric power and pump etc. provided and all made ready for the commencement of the mussel season.

To the end of the year, three series each of four samples were taken, i.e. of untreated mussels, and of mussels of the same batch after 24 hours, 48 hours and 72 hours treatment in the tanks. These samples were examined at the Public Health Laboratory at Exeter and the results indicated the complete bacteriological purification of the mussels in the majority of samples. The remainder were well within the "satisfactory" standard of the Fishmongers' Company. As a result Teign Mussels are now admitted for sale at Birmingham and London markets, from which they had been excluded for many years.

#### SECTION XV.

##### Medical Inspection of Aliens.

Not applicable to this authority.

---
